

# Get An Edge on Fall Prevention

Reduce the number of patient falls and hip fractures.

## The UltiMat® with EdgeSense®

The selectable **EdgeSense®** feature provides the nursing staff with a proactive, true early warning alarm if the patient is sitting on the edge of the bed about to exit. Unlike other systems available, the patient's weight does not have to be removed from the UltiMat sensor before an alarm will sound. This just makes good sense. We call it **EdgeSense®**.

### UltiMat® (Bed) Sensor

- Ultra Thin Design Reduces Potential for Decubitus Ulcers
- Factory Attached Bands & Clips
- **EdgeSense®** Provides Alarm when Patient Sits on Edge of Bed
- Water Tight Design = Easy To Clean

### BedCall® Monitor

- User Friendly / Portable
- Interfaces with Nurse-Call System
- Selectable Time Delay
- Volume Control
- Selectable **EdgeSense®** Feature
- Hold Feature
- Auto-Reset Feature

## ChairCall® Patient Monitoring System

### UltiMat® (Chair) Sensor

- Ultra Thin Design Reduces Potential for Decubitus Ulcers
- Factory Attached Adhesive Strip
- Water Tight Design = Easy To Clean

### ChairCall® Monitor

- User Friendly / Portable
- Battery Powered
- Nurse-Call Option
- Hold Feature
- Automatic One Second Time Delay
- Low Battery Indicator
- Auto-Silence Feature
- Attached Metal Clip
